

COACH STATS

UX/UI User Testing Script

Version 1.0 — 2026

Test URL	https://coachstats.netlify.app
Device	iPhone or iPad (Safari)
Session length	45–60 minutes
Participant type	GAA coach, manager or analyst
Facilitator	
Date	

1. Facilitator Guide

This script guides a moderated usability test of Coach Stats. The goal is to identify friction points, confusing UI, and missing features — not to test the participant's knowledge.

Facilitator note: *Think aloud protocol: ask participants to narrate what they are doing and why as they go. Do not guide them — only intervene if they are completely stuck after 2 minutes.*

Before the Session

1. Open coachstats.netlify.app on the test device in Safari (not the installed PWA)
2. Have a test account ready: ciarandagen@icloud.com with known password
3. Prepare note-taking sheet (Section 5) — print or use digital copy
4. Record the session if participant consents
5. Brief the participant: "We are testing the app, not you — there are no wrong answers"

Opening Questions (5 mins)

Ask these before showing the app:

- What GAA role do you have — coach, manager, analyst?
- What county / club / level do you work at?
- Do you currently use any apps or tools to track stats during games?
- If yes — what do you use, and what do you wish it did better?
- How comfortable are you with using apps on your phone generally?

Closing Questions (5 mins)

Ask these after all tasks are complete:

- What was the one thing that stood out most — positively or negatively?
- Was there anything you expected to find but couldn't?
- On a scale of 1–10, how likely would you be to use this on the sideline?
- What one change would make the biggest difference for you?
- Would you recommend this to another GAA coach?

Severity Scale for Issues Found

Rating	Meaning
 Critical	User cannot complete the task — blocks core functionality
 Major	Significant frustration or confusion — user completes task but struggles
 Minor	Small friction — user notices something is off but recovers quickly
 Positive	Something that worked especially well — note it for reinforcement

2. Testing Tasks

T1 Install the App

Goal: Participant installs Coach Stats to their home screen without guidance

Steps to give participant:

6. Open Safari and go to coachstats.netlify.app
7. Install it to your home screen so you can use it like a proper app

What to observe:

- Does the participant notice the install prompt banner?
- Do they find Share → Add to Home Screen without prompting?
- Do they get confused about why they need Safari specifically?
- How long does the install take end-to-end?
- Do they know the app is installed correctly?

Task passes if:

Participant successfully adds the app to their home screen and opens it from there within 3 minutes.

T2 Create an Account & Log In

Goal: Participant creates a new account and signs in

Steps to give participant:

8. Create a new account using your own email address
9. Sign in with the account you just created

What to observe:

- Does the participant find the Register tab without prompting?
- Are the password requirements clear?
- Does the confirmation / error messaging make sense?
- Does the app land them in the right place after login?
- Any confusion about the 30-day trial?

Task passes if:

Participant signs in and the main app (Match tab) is visible within 4 minutes.

T3 Set Up a Match

Goal: Participant sets up teams, competition and starts the clock

Steps to give participant:

10. Set up a match — your team vs any opposition
11. Select the competition you play in
12. Start the game

What to observe:

- Do they find the team name buttons immediately?
- Does the team search work as expected?
- Do they find the competition picker — and understand the recent picks?
- Do they find Start Game without prompting?
- Does the clock starting give clear feedback?
- Do the team names appear in the Record tab header after setup?

Task passes if:

Both team names set, competition selected, clock running — all within 3 minutes.

T4 Record a Score

Goal: Participant records a point and a goal for their team

Steps to give participant:

13. Your team scores a point from play — record it
14. Your team scores a goal — record it

What to observe:

- Do they navigate to the Record tab independently?
- Do they understand the Home/Away column split?
- Do they find Shot from Play without confusion?
- Does the outcome panel make sense (Point/Goal/Wide etc.)?
- Do they try to select a zone or skip it?
- Does the scoreboard update give clear visual feedback?
- Any confusion about which column is Home vs Away?

Task passes if:

Two shots recorded (point + goal), scoreboard shows 1-01, within 3 minutes.

T5 Tag an Event to a Player

Goal: Participant tags a ball won to a specific player

Steps to give participant:

15. Your midfielder wins the ball — record this and tag it to a player

What to observe:

- Do they find the Ball Won button?
- Do they notice the player name list at the bottom of the panel?
- Do they tap the player BEFORE the outcome, or after?
- If they get it wrong, do they know how to try again?
- Do they understand what the tagging is for?

Task passes if:

Ball Won event recorded AND linked to a named player, within 2 minutes.

T6 Record a Substitution

Goal: Participant records a substitution during the game

Steps to give participant:

16. Your number 9 is coming off, number 22 is coming on at minute 40 — record this

What to observe:

- Do they find the Substitutions section on the Record tab?
- Do they know they need to tap the heading to expand it?
- Is the substitution modal clear and easy to fill in?
- Do they know where to find the substitution in the match record afterwards?

Task passes if:

Substitution recorded showing correct minute, players and team, within 2 minutes.

T7 View Stats and Save the Match

Goal: Participant finds the stats page and saves the match

Steps to give participant:

17. Look at the full stats for this match

18. Add a short note about the match

19. Save the match so you can review it later

What to observe:

- Do they navigate to Stats tab independently?
- Is the stats table readable and understandable?
- Do they find the Match Notes section?
- Do they understand what Save Match does?
- Do they notice the green confirmation banner?
- Do they try the Shot Map button?

Task passes if:

Stats viewed, note added, match saved (green banner shown), within 3 minutes.

T8 Find a Past Match and Share the Report

Goal: Participant finds a saved match and shares the report

Steps to give participant:

20. Find the match you just saved

21. Share a summary of this match via WhatsApp or email

What to observe:

- Do they navigate to History tab independently?
- Do they understand the match card layout?
- Do they find the Share button?
- Does the iOS share sheet appear as expected?
- Is the shared content useful / readable?

Task passes if:

History opened, share sheet triggered with match summary text, within 2 minutes.

T9 Add a Fixture

Goal: Participant adds an upcoming match to the fixture list

Steps to give participant:

22. Add your next match to the app — it's in 2 weeks against your local rivals

What to observe:

- Do they find the Fixtures button in History?
- Is the Add Fixture form intuitive?
- Do they fill in all relevant fields (date, opponent, competition)?
- Do they understand Home/Away/Neutral selection?
- Does the fixture appear correctly in the list?

Task passes if:

Fixture added with date, opponent and competition, appears in Upcoming list, within 2 minutes.

T10 Log a Player Injury

Goal: Participant logs an injury for a squad player

Steps to give participant:

23. One of your players has picked up a hamstring strain — log this in the app

What to observe:

- Do they find Training tab → Players view?
- Do they find the Injury Log section in a player profile?
- Is the injury form clear (type, date, return date)?
- Do they notice the red badge on the squad grid after logging?
- Do they understand Active vs Recovered status?

Task passes if:

Injury logged for a player with type and date, red badge visible on squad grid, within 3 minutes.

T11 Use the Opposition Database

Goal: Participant finds and reviews an opponent profile

Steps to give participant:

24. Look up how your team has performed against a specific club

What to observe:

- Do they find the Opposition DB button in History?
- Is the club list and W/D/L record clear at a glance?
- Do they tap through to a club profile?
- Do they understand what's in the profile (record, match history, scout reports, notes)?
- Do they add a note to the club?

Task passes if:

Club profile opened, record stats visible, note added, within 3 minutes.

T12 Analyse Video and Create a Highlight Clip

Goal: Participant tags an event and creates a clip from a video

Steps to give participant:

25. Go to any saved match and open Video Analysis

26. Load this YouTube video: <https://www.youtube.com/watch?v=dQw4w9WgXcQ>

27. Tag any event at any point in the video

28. Create a highlight clip from that tag

What to observe:

- Do they find Video Analysis from the History tab?
- Is loading a video URL intuitive?
- Do they find the event buttons and tag an event?
- Do they see the  clip button on the tag?
- Do they understand the Tags vs Clips tab switch?
- Is the Save Clip modal clear (label, category, in/out)?
- Do they share or export the clip sheet?

Task passes if:

Video loaded, event tagged, clip created from tag with label and category, within 5 minutes.

3. Observation Sheet

Complete one row per task. Use the severity scale from Section 1.

Task	What participant said / did	Issues found	Severity    
T1 Install			
T2 Login			
T3 Match setup			
T4 Record score			
T5 Tag player			
T6 Substitution			
T7 Stats + save			
T8 Share report			
T9 Fixture			
T10 Injury log			
T11 Opposition DB			
T12 Video + clip			

4. Findings Summary Template

Complete after the session. Use one section per severity level.

Critical Issues

Tasks that could not be completed:

-
-

Major Issues

Tasks completed with significant struggle:

-
-

Minor Issues

Small friction points observed:

-
-

What Worked Well

Moments of delight or smooth flow:

-
-

Participant Quotes

Notable things the participant said (direct quotes):
